

ALLIANCE / TYRES / PRODUCT SPECIFICATION

12.5-20MPT Alliance 225 133F 12 PR

The tread pattern of 225 MPT is designed for self-cleaning as well as for smooth on road driving. The diagonal lug design of the tire provides best traction in all services, terrain and weather conditions besides improving resistance to side slips. Its wide based design provides high flotation properties and permits low inflation pressure. For free rolling and better mileage on road service, it is recommended to mount tires in opposite direction than usual.

Technical specification

Brand	Alliance
Range	225
Size	12.5-20MPT
Section width (mm)	325
Overall diameter (mm)	1040
Loaded static radius (mm)	473
Rolling circumference (mm)	3090
Listed rims	11
Rating	12 133F
Ply rating	12
Load index	133
Speed rating	F
Service description	133F
