

ALLIANCE / TYRES / PRODUCT SPECIFICATION

11.2-28 Alliance 304 112A8

The Alliance 304 is an R-1 tread drive wheel tire for application as a rear tractor tire. Its knife-like lugs are designed for deeper penetration of the ground. The double-angle design with a wide space between lugs ensures efficient self-cleaning properties in any kind of soil. The design, based on 45 angle bar with center studs, provides better resistance to side slippage and continuous rolling. The tire is recommended for hillside operations and for occasional short drives on the road. A strong nylon carcass guards against mechanical failures and moisture deterioration.

Technical specification

Brand	Alliance
Range	304
Size	11.2-28
Section width (mm)	284
Overall diameter (mm)	1205
Loaded static radius (mm)	560
Rolling circumference (mm)	3621
Listed rims	W10 W10H W9
Rating	6
Load index	112
Speed rating	A8
Service description	112A8
