

ALLIANCE / TYRES / PRODUCT SPECIFICATION

12.4-24 Alliance 324 HD 129A8 12 PR

Alliance 324 HD is a bias tire for agricultural applications. The self-cleaning deep lugs are specially designed to provide high traction and a long life. The unique tread design with a tie bar at the center provides additional strength to the lugs and hence reduces tire wear. Certain sizes are reinforced with a special stubble guard compound, which safeguards the tire from punctures and other damages.

Technical specification

Brand	Alliance
Range	324 HD
Size	12.4-24
Section width (mm)	315
Overall diameter (mm)	1160
Loaded static radius (mm)	533
Rolling circumference (mm)	3461
Listed rims	W11
Rating	12 129A8
Ply rating	12
Load index	129
Speed rating	A8
Service description	129A8
