

ALLIANCE / TYRES / PRODUCT SPECIFICATION

30.5LR32 Alliance 360 167A8 / 164B

Alliance 360 is an extra wide tire available in radial for use in agricultural tractors and combine harvesters for farming. It is characterised by increased load capacity for the same inflation pressure. This means that the low inflation pressure combined with large footprint helps reduce soil compaction. Low angled lugs of the tire at the shoulder area improve traction, while higher angles around the tire centre line improve ride comfort. This leads to increased tire traction efficiency by an effective traction/slip characteristic. Also the strong radial construction with reinforced beads and sidewalls provide long tire life.

Technical specification

Brand	Alliance
Range	360
Size	30.5LR32
Section width (mm)	775
Overall diameter (mm)	1819
Loaded static radius (mm)	803
Rolling circumference (mm)	5379
Listed rims	DW27 DW27A
Rating	167A8 164B
Load index	167 / 164
Speed rating	A8 / B
Service description	167A8 / 164B

Specification notes

Multiple service descriptions are listed for this size. Tell us your application, load and speed so the required specification can be confirmed.
