

ALLIANCE / TYRES / PRODUCT SPECIFICATION

540/65-28 Alliance 360 155A8 / 162A2 16 PR

Alliance 360 is an extra wide tire available in radial for use in agricultural tractors and combine harvesters for farming. It is characterised by increased load capacity for the same inflation pressure. This means that the low inflation pressure combined with large footprint helps reduce soil compaction. Low angled lugs of the tire at the shoulder area improve traction, while higher angles around the tire centre line improve ride comfort. This leads to increased tire traction efficiency by an effective traction/slip characteristic. Also the strong radial construction with reinforced beads and sidewalls provide long tire life.

Technical specification

Brand	Alliance
Range	360
Size	540/65-28
Section width (mm)	520
Overall diameter (mm)	1448
Loaded static radius (mm)	668
Rolling circumference (mm)	4331
Listed rims	W16L
Rating	16 155A8 162A2
Ply rating	16
Load index	155 / 162
Speed rating	A8 / A2
Service description	155A8 / 162A2

Specification notes

Multiple service descriptions are listed for this size. Tell us your application, load and speed so the required specification can be confirmed.
