

ALLIANCE / TYRES / PRODUCT SPECIFICATION

600/65R28 Alliance 360 154

Alliance 360 is an extra wide tire available in radial for use in agricultural tractors and combine harvesters for farming. It is characterised by increased load capacity for the same inflation pressure. This means that the low inflation pressure combined with large footprint helps reduce soil compaction. Low angled lugs of the tire at the shoulder area improve traction, while higher angles around the tire centre line improve ride comfort. This leads to increased tire traction efficiency by an effective traction/slip characteristic. Also the strong radial construction with reinforced beads and sidewalls provide long tire life.

Technical specification

Brand	Alliance
Range	360
Size	600/65R28
Section width (mm)	600
Overall diameter (mm)	1480
Loaded static radius (mm)	694
Rolling circumference (mm)	4511
Listed rims	DW20B DW18L
Rating	154
Load index	154
