

ALLIANCE / TYRES / PRODUCT SPECIFICATION

650/65R38 Alliance 360 178A8 / 175B

Alliance 360 is an extra wide tire available in radial for use in agricultural tractors and combine harvesters for farming. It is characterised by increased load capacity for the same inflation pressure. This means that the low inflation pressure combined with large footprint helps reduce soil compaction. Low angled lugs of the tire at the shoulder area improve traction, while higher angles around the tire centre line improve ride comfort. This leads to increased tire traction efficiency by an effective traction/slip characteristic. Also the strong radial construction with reinforced beads and sidewalls provide long tire life.

Technical specification

Brand	Alliance
Range	360
Size	650/65R38
Section width (mm)	645
Overall diameter (mm)	1835
Loaded static radius (mm)	860
Rolling circumference (mm)	5625
Rating	178A8 175B
Load index	178 / 175
Speed rating	A8 / B
Service description	178A8 / 175B

Specification notes

Multiple service descriptions are listed for this size. Tell us your application, load and speed so the required specification can be confirmed.
Please ask Nordic to confirm the remaining dimensions and wheel requirements for your application.
