

ALLIANCE / TYRES / PRODUCT SPECIFICATION

650/75R32 (24.5R32) Alliance 360 172A8

Alliance 360 is an extra wide tire available in radial for use in agricultural tractors and combine harvesters for farming. It is characterised by increased load capacity for the same inflation pressure. This means that the low inflation pressure combined with large footprint helps reduce soil compaction. Low angled lugs of the tire at the shoulder area improve traction, while higher angles around the tire centre line improve ride comfort. This leads to increased tire traction efficiency by an effective traction/slip characteristic. Also the strong radial construction with reinforced beads and sidewalls provide long tire life.

Technical specification

Brand	Alliance
Range	360
Size	650/75R32 (24.5R32)
Section width (mm)	650
Overall diameter (mm)	1794
Loaded static radius (mm)	812
Rolling circumference (mm)	5358
Listed rims	DW23B
Rating	172A8 172A8
Load index	172
Speed rating	A8
Service description	172A8

Specification notes

Multiple service descriptions are listed for this size. Tell us your application, load and speed so the required specification can be confirmed.
