

ALLIANCE / TYRES / PRODUCT SPECIFICATION

650/75R32 Alliance 360 172D / 175A8

Alliance 360 is an extra wide tire available in radial for use in agricultural tractors and combine harvesters for farming. It is characterised by increased load capacity for the same inflation pressure. This means that the low inflation pressure combined with large footprint helps reduce soil compaction. Low angled lugs of the tire at the shoulder area improve traction, while higher angles around the tire centre line improve ride comfort. This leads to increased tire traction efficiency by an effective traction/slip characteristic. Also the strong radial construction with reinforced beads and sidewalls provide long tire life.

Technical specification

Brand	Alliance
Range	360
Size	650/75R32
Rating	172D 175A8
Load index	172 / 175
Speed rating	D / A8
Service description	172D / 175A8

Specification notes

Multiple service descriptions are listed for this size. Tell us your application, load and speed so the required specification can be confirmed.
Please ask Nordic to confirm the remaining dimensions and wheel requirements for your application.
