

ALLIANCE / TYRES / PRODUCT SPECIFICATION

VF750/65R26 (28LR26)NRO Alliance 360 158A8 / 155B

Alliance 360 is an extra wide tire available in radial for use in agricultural tractors and combine harvesters for farming. It is characterised by increased load capacity for the same inflation pressure. This means that the low inflation pressure combined with large footprint helps reduce soil compaction. Low angled lugs of the tire at the shoulder area improve traction, while higher angles around the tire centre line improve ride comfort. This leads to increased tire traction efficiency by an effective traction/slip characteristic. Also the strong radial construction with reinforced beads and sidewalls provide long tire life.

Technical specification

Brand	Alliance
Range	360
Size	VF750/65R26 (28LR26)NRO
Section width (mm)	751
Overall diameter (mm)	1623
Loaded static radius (mm)	700
Rolling circumference (mm)	4769
Listed rims	DW25B DW25A DW23A 23
Rating	158A8 155B
Load index	158 / 155
Speed rating	A8 / B
Service description	158A8 / 155B

Specification notes

Multiple service descriptions are listed for this size. Tell us your application, load and speed so the required specification can be confirmed.
