

ALLIANCE / TYRES / PRODUCT SPECIFICATION

18.00-25 Alliance 400S 40A2 40 PR

Alliance 400S is specially designed to provide durability to reach stackers that operate for long hours on hard and abrasive surfaces. Its smooth construction results in maximum rubber volume thus ensuring longer tire life. The tire is able to perform under high stress conditions owing to its specially constructed casing. The presence of heat and abrasion resistant compounds ensure smooth working on harsh and abrasive surfaces. STACKER

Technical specification

Brand	Alliance
Range	400S
Size	18.00-25
Section width (mm)	505
Overall diameter (mm)	1653
Loaded static radius (mm)	735
Rolling circumference (mm)	4547
Listed rims	13
Rating	40 A2
Ply rating	40
Load index	40
Speed rating	A2
Service description	40A2
