

ALLIANCE / TYRES / PRODUCT SPECIFICATION

23.1-26 Alliance YIELD MASTER 349 156A6 14 PR

Alliance 349 Yield Master is a premium bias tire offering with a stubble-resistant tread compound making it an ideal choice for on and off-road harvester applications. Its tread design with a 23 lug angle enables higher traction, good self-cleaning and low soil compaction. Its larger footprint results in a larger contact area while enabling excellent grip. The larger amount of rubber in contact with the ground results in slow tire wear and provides excellent roadability.

Technical specification

Brand	Alliance
Range	YIELD MASTER 349
Size	23.1-26
Section width (mm)	592
Overall diameter (mm)	1605
Loaded static radius (mm)	730
Rolling circumference (mm)	4803
Listed rims	DW20B
Rating	14 156A6
Ply rating	14
Load index	156
Speed rating	A6
Service description	156A6
